## Work Experience

---

### Software Engineer (TypeScript/Next.js)

05/2024 - 09/2024 (5 mos)

Wishland Software Technology Inc. (under One Second Team)

Makati, Metro Manila, Philippines

- Revamped the codebase for an admin portal, integrating new features to align with evolving business requirements
- Performed comprehensive code analysis and redeveloped the entire codebase for six project templates, improving readability, scalability and maintainability, which became the foundation for over 20+ client-facing projects
- Managed repositories on GitHub, and handled both staging and production deployments via Netlify and Vercel
- Collaborated with team members, including our Korean counterparts, on client revisions, bug fixes and overall project improvements
- Enforced coding standards that adhered to industry best practices, ensuring consistency and quality across all client-facing projects

### Frontend Developer (TypeScript/Next.js)

03/2024 - 04/2024 (2 mos)

New Stars Solutions Inc.

Paranaque, Metro Manila, Philippines

- Developed reusable, scalable and high-performance components optimized for seamless integration across the entire application
- Employed expertise in user experience design to proactively identify and address UX-related challenges
- Leveraged Git version control proficiently to facilitate collaborative development efforts, ensuring comprehensive tracking of modifications and efficient management of codebase
- Advocated for and implement clean coding practices, enhancing codebase readability, maintainability and performance efficiency
- Fostered a collaborative development environment through code reviews, fostering cohesion and maintaining consistent code quality

### Frontend Developer (TypeScript/Next.js)

11/2022 - 06/2023 (8 mos)

Seaplane Group

Hong Kong, Hong Kong SAR

- Took ownership of developing user-facing features for two (2) company projects, the Mile High Roller Club and Operator Portal
- Redesigned the user interface of the Operator Portal completely to elevate visual appeal and user experience while balancing functionalities, seamlessly harmonizing aesthetics and functionalities, resulting in reduction of reported UI/UX related issues
- Performed a 100% restructuring of files and folders for better organization and ease-of-maintenance
- Implemented React optimization techniques such as memoization, preventing unnecessary re-rendering and code-splitting resulted in more than ~40% performance increase (benchmark using Lighthouse)
- Integrated eleven (11) modules of data and API services from Node.js, Express.js and MongoDB that includes assets, ride-sharing, bookings, transactions, coupons, add-ons, newsletters, etc.

### Frontend Developer (React)

01/2022 - 06/2022 (6 mos)

Highly Succeed Inc.

Mandaluyong, Metro Manila, Philippines

- Launched two (2) projects successfully and contributed to the development and maintenance of six (6) other projects for company clients
- Analyzed current functionalities with regards to performance and user experience, and recommended necessary enhancements which resulted in ~40% boost in performance (benchmark using Lighthouse)
- Applied organizational abilities to coordinate with Project Managers and the Scrum Master, resulting in reduction of tasks coordination time, improvement of ticket documentation accuracy, and increased precision of time estimation within Jira
- Collaborated closely with UI/UX designer to ensure balance of aesthetics and technical feasibility which reduce delay in development, testing and overall output delivery
- Coordinated with Project Managers, Scrum Master, QA analysts and co-developers to resolve bugs and performance issues

## Education

---

### Polytechnic University of the Philippines

06/2015 - 03/2020

Bachelors's studies, Computer Engineering

Manila, Metro Manila, Philippines

## Skills

---

**Programming Languages:** JavaScript, TypeScript, Python (beginner), C (beginner)

**Frontend:** React, Next.js, MUI, Tailwind, Chakra UI, Ant Design, Bootstrap, styled-components, HTML, CSS, Sass

**Backend (in progress):** Node.js, Express.js, Handlebars.js, REST API, NoSQL, MongoDB, Mongoose

**State Management:** Redux, Redux Toolkit, Zustand

**Testing (in progress):** Mocha, Chai

**Tools:** Git, Chrome DevTools, VS Code, ESLint, Axios, Postman, Compass, Linux, Ubuntu, Jira, Monday, Notion

**Hosting:** Vercel, Netlify, Render, GitHub, Firebase, MongoDB Atlas

**Concepts:** Algorithms, Data Structures, SDLC, OOP, SOLID, Clean Code, BEM, Agile, Scrum

**Design:** Figma, Wireframing, UX Fundamentals, Design Principles
